

Kevin Casey

(408) 477-6092 | kacasey@berkeley.edu | kevincasey.herokuapp.com

EDUCATION

University of California, Berkeley

Major: Electrical Engineering and Computer Science

B.S. Expected May 2016

GPA: 3.9

Relevant Coursework:

Software Engineering, Artificial Intelligence, Computer Security, Algorithms, Data Structures, Machine Structures, Macintosh Developers for OS X, Microelectronic Circuits, Operating Systems, Signals and Systems

EXPERIENCE

Godaddy - Software Engineering Intern

Summer 2014

- Worked on the Online Store product, which is built from Spree in Ruby on Rails
- Implemented Google Analytics tracking across the site in order to help make business decisions
- Supported Phase 1 internationalization by allowing merchants to change country, currency, date format and weight measurement systems.
- Added translation capacities onto the storefront so that themes can be internationalized.
- Created Spree Plugins extension - github.com/godaddy/spree_plugins

Facebook Open Academy

Spring 2014

- Invited by Berkeley Professor Armando Fox to attend Facebook's Open Academy Program
- Worked with a team of students from universities around the world to contribute to Rails with the help of experienced mentors.

PROJECTS

Community - github.com/skleung/Community

Summer 2014

- Designed to automate splitting the cost of buying ingredients for home cooked meals. Ruby on Rails
- User records which diners/ingredients were at a meal and we estimate how much of each ingredient was used at a meal to compute the cost of meals. Integrates with Venmo for easy payment

Pacman Contest - CS188 Artificial Intelligence

Spring 2014

- 1st place winner in a contest of multi agent competitive capture the flag. Python.
- Utilized MST approximation to cluster food pellets (flags) and dynamic programming in order to compute a trap table on startup to assist in choosing the best moves.

Hack FSM (Free Speech Movement)

April 2014

- 1st place winner in a weeklong hackathon hosted by the Bancroft Library at Berkeley.
- Designed a Python Bottle frontend to pull data from the SOLR based digital archive
- Integrated a calendar and parsed through various fields/images/audio clips to respond to user searches

Photo Evidence Gallery - github.com/cs169-2013/photo_evidence_gallery

Fall 2013

- Developed a Ruby on Rails application for the Bay Area Mountain Rescue Unit that is a secure photo repository to quickly share law-enforcement sensitive information.
- Used Agile development to implement features like cropping, rotation, batch uploads, geotagging

Activities

HKN - EECS Honors Society - Computing Services Officer

Fall 2013 - Spring 2014

- Did full stack development for the Ruby on Rails HKN website - hkn.eecs.berkeley.edu
- sysadmin - Maintained servers, user accounts, and mailing lists

Skills

Programming Languages - Ruby, Javascript, HTML, CSS, C, Objective C, Python, Java

Frameworks - Rails, Google App Engine, Meteor
